

Jupyterを開くとConnection Errorが出る問題への対処法

Windows(L2TP VPN)向け. Firefoxのプロキシ設定を使います.

□ 手順

- Firefoxを開き, 設定→接続設定
- 右図のように設定を入力
- Windowsのプロキシ設定をすべてoffにし, JupyterをFirefoxで開く

The screenshot shows the 'Network Settings' dialog box in Firefox. The 'Proxy' tab is selected. Under 'Automatic Proxy Settings', the 'URL' field is set to 'http://proxy.uec.ac.jp/'. The 'Manual Proxy Configuration' section is expanded, showing the 'SOCKS v5' option selected. The 'SOCKS v5' section is further expanded, showing the 'Host' field set to '130.153.0.0/16, 192.50.30/23'. Below this, there are checkboxes for 'Bypass for local addresses' (checked), 'Use SOCKS v5 for DNS' (unchecked), and 'Use DNS over HTTPS' (unchecked). At the bottom, there is a dropdown menu for 'Proxy Provider' set to 'Cloudflare (既定)'. Buttons for 'OK', 'キャンセル' (Cancel), and 'ヘルプ(H)' (Help) are at the bottom right.

□ 注意点

- 上記の手順でうまくいかなければVPNに再接続するとうまくいく場合あり.
- Zoomが落ちる場合, Firefox経由でURLを開くと再接続できる場合が多い.
